Managerial Accounting is designed for accounting and nonaccounting business students. It covers the managerial use of accounting data for planning, control, and decision making. As in the preceding volumes in the Schaum's Outline Series in Accounting, the solved problems approach is used, with emphasis on the practical application of managerial accounting concepts, tools, and methodology.

Introduction to Macroeconomics Lecture Notes

By contrast, microeconomics treats economic processes that concern individuals. Example: The decision of a firm to purchase a new office chair from company X is not a macroeconomic problem. The reaction of Austrian households to an increased rate of capital taxation is a macroeconomic problem.
